

Integrated Resources Plan: Drivers of Change, Survey Results, and Constructing Scenarios

Integrated Resources Plan Special Committee Item 6b
June 23, 2020

Overview

- Feedback on drivers of change
- Survey results
- Method for constructing scenarios

RP Committee Item 6b Slide 2 June 23, 2020

Feedback on Drivers of Change and Survey Results

Feedback by the Numbers

3 New Drivers

- Impacts of mandatory groundwater management
- Impacts on replenishment
- Public support

Edits to Existing Drivers

- Neutral drivers
- Various edits

Purpose of Survey

- Indication of importance of the drivers of change
 - Not voting on which drivers of change will be used
- Help to develop scenario framework
 - Basis for constructing scenario narratives

Survey Context

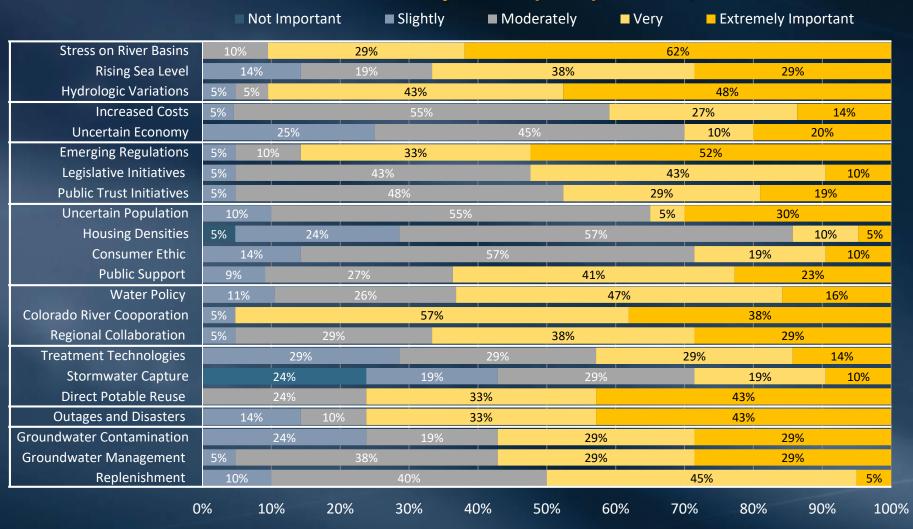

- The survey was distributed to following groups:
 - Metropolitan Board of Directors
 - Member Agencies
 - Stakeholders
- Context of the survey questions:
 - Importance of the driver as it impacts Southern California's water supply reliability

Survey Results

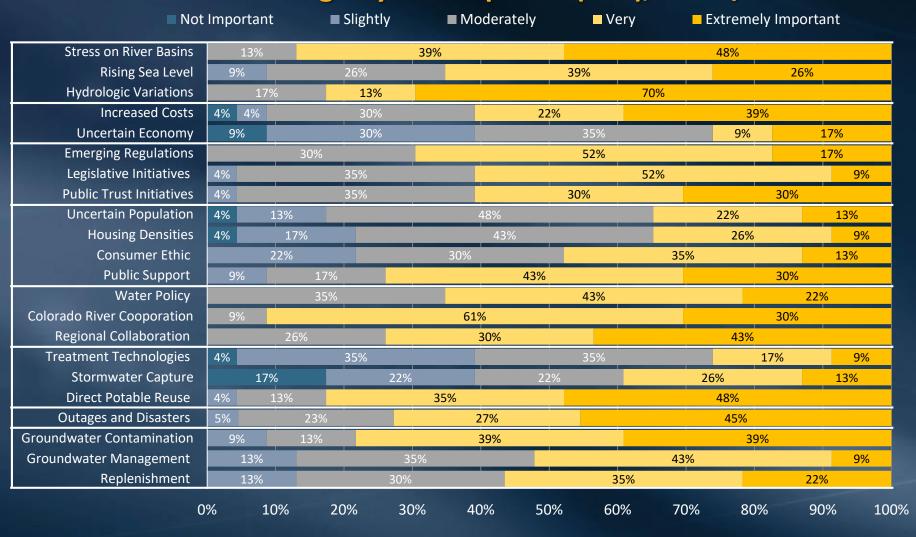

Survey Response Statistics by Driver

Board Members - 25 Responses (70%); 13% N/A

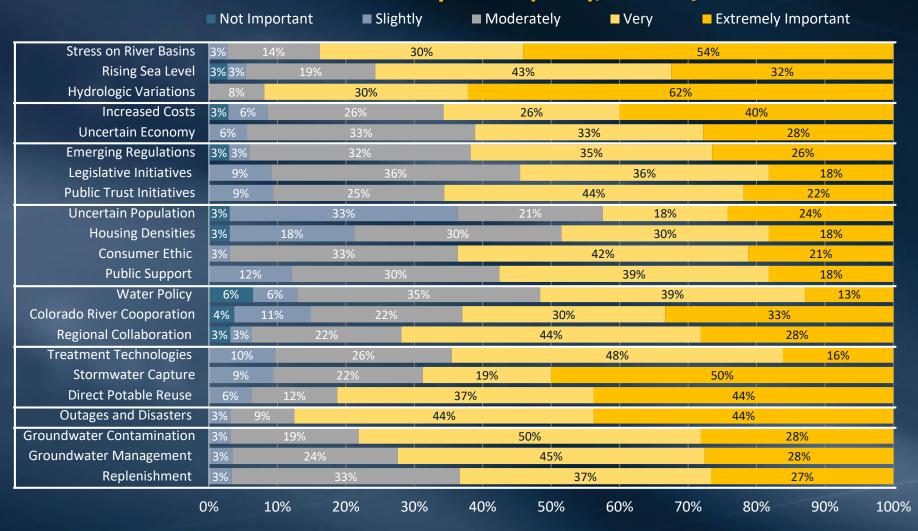

Survey Response Statistics by Driver

Member Agency - 23 Responses (89%); <1% N/A

Survey Response Statistics by Driver

Stakeholders - 43 Responses (10%); 4.6% N/A

IRP Committee Item 6b Slide 10 June 23, 2020

Top 5 Survey Rankings by Cohort

Based on Percentage of Responses that were Extremely or Very Important

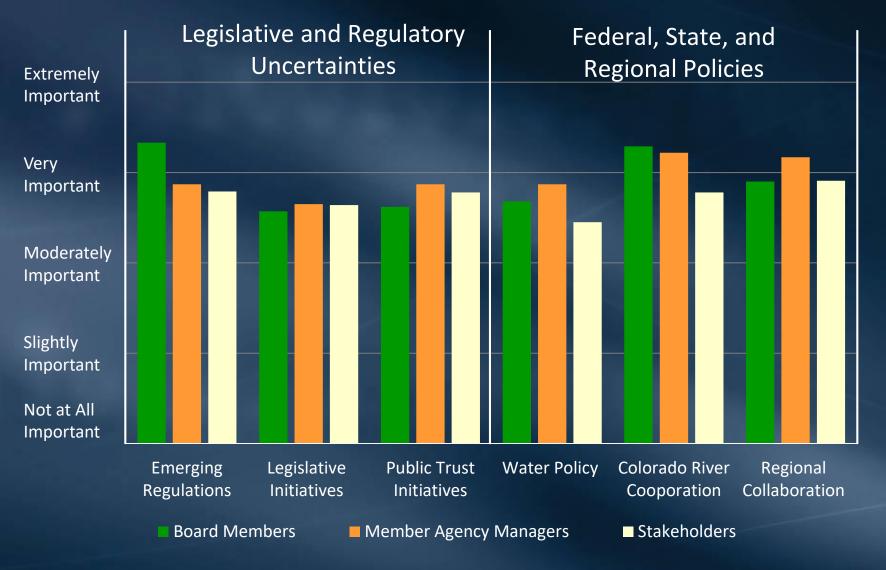

Board Members	%		
Colorado River Cooperation	95%		
Hydrologic Variations	90%		
Stress on River Basins	90%		
Emerging Regulations	86%		
Direct Potable Reuse	76%		
Outages & Disasters	76%		

Member Agencies	%
Colorado River Cooperation	91%
Stress on River Basins	87%
Direct Potable Reuse	83%
Hydrologic Variations	83%
Groundwater Contamination	78%

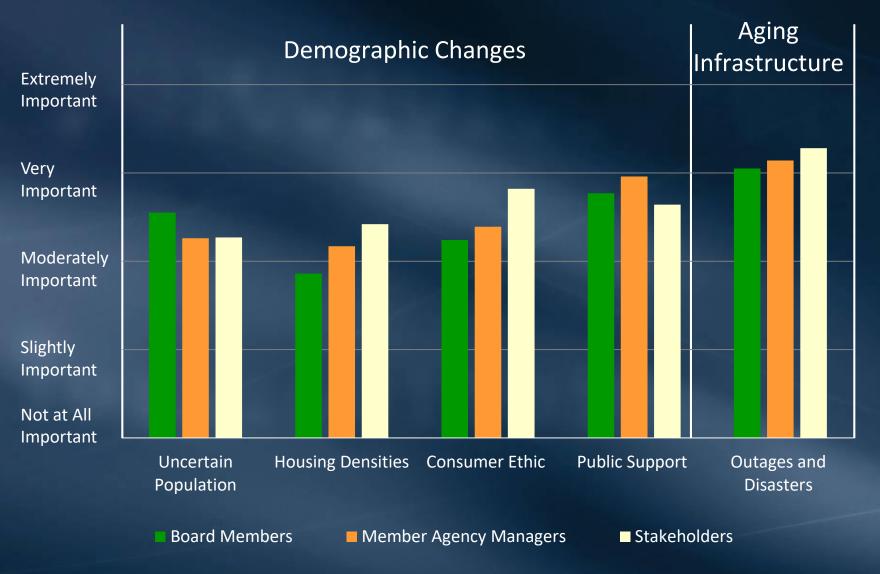

Stakeholders	%
Hydrologic Variations	92%
Outages and Disasters	87%
Stress of River Basins	84%
Direct Potable Reuse	81%
Groundwater Contamination	78%

Process Steps

Identify
Drivers of
Change

Construct
LearningScenarios

Develop Portfolios Develop
Adaptive
Management
Plan

- Identify and develop a list of drivers of change
 - Metropolitan Board updates
 - Member agency participation/feedback loop
 - Stakeholder involvement

RP Committee Item 6b Slide 19 June 23, 2020

Process Steps

Identify
Drivers of
Change

Construct Learning Scenarios

Develop Portfolios Develop
Adaptive
Management
Plan

- Identify scenario framework
 - Allows us to construct scenarios addressing a range of plausible futures
 - Qualitative and quantitative assessment of drivers and their impact and uncertainty

RP Committee Item 6b Slide 20 June 23, 2020

Scenario Framework

A broad view of the future will better prepare us for the future

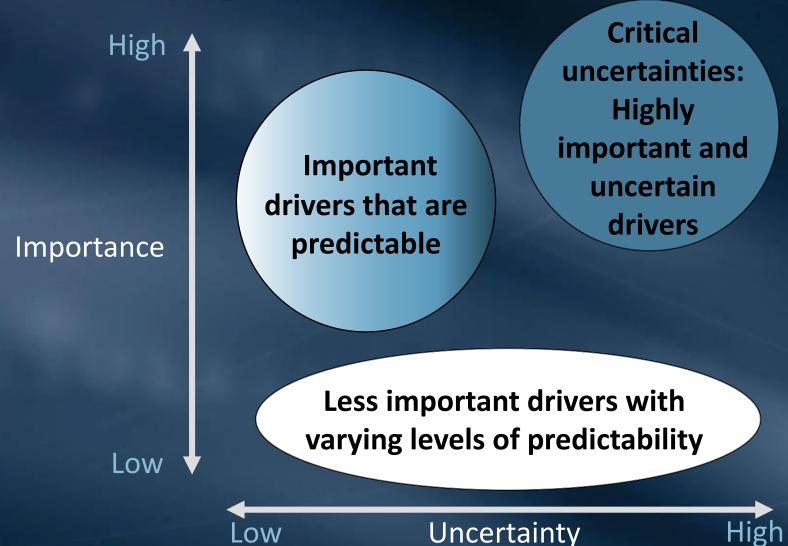

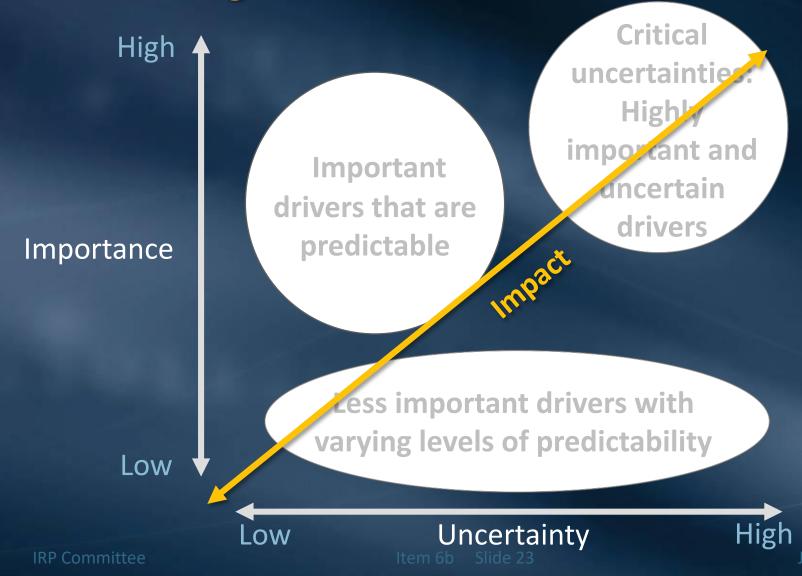

TODAY

FUTURE

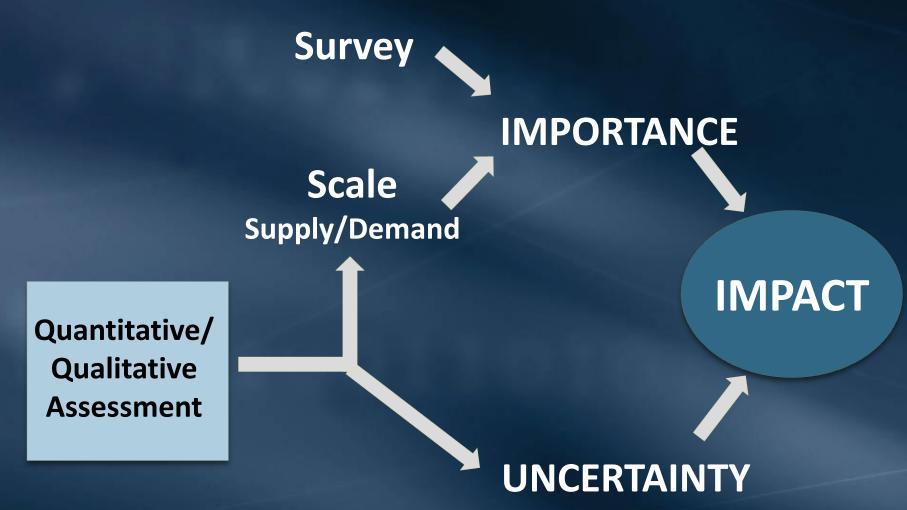

Scenario Framework Establishing How to Get A Broad View

Scenario Framework WRF Example

WERF Study (Brown, 2017)

The WE&RF Interim Research
Plan called for
"A board-driven long-term
strategic visioning process
. . . to define a WE&RF research
strategy for 2018 and beyond."

RP Committee Item 6b Slide 25 June 23, 2020

- **C** Fiscal Constraints
- D Smart Water Grid
- **E** Increased GHG and Temperatures
- F Water Tech Advances

Low

Uncertainty

High

Scenario Framework WRF Critical Uncertainties

Gradual Increase in Disruptions

Rapid Increase in Disruptions

Frequency of Natural Disasters and Disruptive Climate Events

Severe Cutbacks and Revenue Reductions

Steadily Increasing Investments

Availability of Federal, State, and Local Funding

Constructing Scenarios

Steady as She Goes Water Reinvention Race

Gradual Increase in Disruptions

F

Taking on Water

B

Rapid Increase in Disruptions

Launch the Lifeboats

Decreased Investments

Constructing Scenarios A – Aging Infrastructure Increased Investments

for increase repair **SHEADING** repair **SHEADING** replacement

and LA ing with tion failur Race

Gradual Increase in Disruptions

Increased by deet n spent on u A ned infrastructure aflures Infrastructure failure outpar A pairs and service revers decline

Rapid Increase in Disruptions

A - Aging Infrastructure

Decreased Investments

P Committee Item 6b Slide 30 June 23, 202

Constructing Scenarios D – Smart Water Grid

Increased Investments

Large regional utilities implement improved SCADA systems

Smart-grid enables virtual centralization of new decentralized approaches

Gradual Increase in Disruptions

Cheap IT monitors central failures and new decentralized systems flourish Disruptions ling centralized

Failing centralized systems serve poor communities while wealthy go off grid

D - Smart Water Grid

Rapid Increase in

Decreased Investments

RP Committee Item 6b Slide 31 June 23, 2020

Constructing Scenarios F – Water Technology Advances Increased Investments

Integrated fit-forpurpose systems with treatment at every scale

Increased emphasis on distributed systems to withstand extremes

Gradual Increase in Disruptions

New technologies applied where public health threats appear

Rapid Increase in Disruptions

Emergency skidmounted treatment travels to disaster sites as needed

F - Water Technology Advances

Decreased Investments

IRP Process Schedule

2020

Steps	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2. Construct Scenarios								
2.1 Qualitative Assessment							Addi	tional
2.2 Quantitative Assessment			-	\rightarrow				tions eded
2.3 Scenario Framework								caca
2.4 Scenario Narratives								
2.4 Supply/Demand Gap calc.								

Metropolitan Board, Member Agency Input and Review Throughout the Process (examples only)

What's Next

- Qualitative and quantitative assessment of drivers
- Collaboratively identify scenarios helpful for policy discussions
- Construct scenarios

RP Committee Item 6b Slide 34 June 23, 2020
